## TECHNOLOGIES

JavaScript

React

Node.js

TypeScript

Gatsby

Git

HTML

CSS

Tailwind

MongoDB

MySQL

Software Engineer and autonomous problem-solver. Always aiming to write human-friendly code that shows great clarity of thought. Looking to make an impact as part of a modern development team.

## EXPERIENCE

### Rule Developer

(Apr 2019 - Present)

Transcepta LLC

- Teaching our system to extract key info from documents in a wide variety of formats.
- Performing programming tasks using vbScript, JavaScript, Regular Expressions, and MySQL.
- Volunteering to train new hires. Becoming the sole training coach, onboarding over 10 new team members in the span of two years.
- Producing internal learning resources, enabling more efficient ramping up of new hires and enhancing quality of work across the team.

### Open Source Contributor

(Jun 2022 - Present)

Various projects

Contributing code, fixing bugs, and making improvements to written content.

Major projects contributed to:

- Gatsby
- freeCodeCamp
- Full Stack Open

## PROJECTS

### Bonsai Notes

TypeScript / React / Node.js / Tailwind

A note-taking web application. It allows the user to categorize their notes using folders (which can be nested to any depth).

My goal with this project is to create a very intuitive note-taking experience, without the steep learning curve that comes along with other note-taking apps.

It's a work in progress, and [current progress can be viewed on Github](#). It uses React for frontend logic, Tailwind for styling, and Object Oriented Programming principles to keep track of the user's notes.

### Project Euler

JavaScript / Mathematics

A series of difficult algorithm challenges. Solved first 30 problems and counting. [Progress tracked on Github](#).

### Budget Snapshot Tool

JavaScript / React / MaterialUI

A web app that enables easy creation of a personal monthly budget. Allows the user to make changes and quickly visualize how their financial picture looks under different circumstances.

## CERTIFICATIONS

### Responsive Web Design

freeCodeCamp

### JavaScript Algorithms and Data Structures

freeCodeCamp

### Front End Development Libraries
