TECHNOLOGIES

JavaScript

React

Node.js

TypeScript

Gatsby

GraphQL

Git

HTML

CSS

Tailwind

MongoDB

Full Stack Developer with experience in programming and team leadership. Proficient in JavaScript, TypeScript, React, and Node.

EXPERIENCE

Rule Developer

(Apr 2019 - Present)

Transcepta LLC

- Teaching our system to intelligently recognize and extract data from varying file types.
- Performing programming tasks using vbScript, JavaScript, Regular Expressions, and MySQL.
- Volunteering to onboard our new employees. Becoming the team's sole training coach, training over 10 people in the span of two years.
- Creating new internal automation scripts to speed up shared workflows within the team.

Open Source Contributor

(Jun 2022 - Present)

Participating in Open Source projects. Contributing code, fixing bugs, and making improvements to written content.

Major projects contributed to:

- Gatsby
- freeCodeCamp
- Full Stack Open

PROJECTS

Bonsai Notes

TypeScript / React / Node.js / Tailwind

A note-taking web app. It allows the user to categorize their notes using folders, which can be nested to any depth. This project aims to provide an intuitive and fully-featured note-taking experience, without the learning curve found in other note-taking apps. Can be viewed at:

🔗 <https://bonsainotes.com/>

Project Euler

JavaScript / Mathematics

A set of very difficult algorithm challenges. Solved first 30 problems and counting. Progress and solutions can be viewed on [Github](#).

Budget Snapshot Tool

JavaScript / React / MaterialUI

An online utility that allows the user to easily mock up a monthly budget. Uses MaterialUI for styling. Can be viewed at:
