Experience

Software Developer

April 2019 - present

Transcepta LLC

- Writing code for the company's internal "Data Extraction" applications.
- Performing programming tasks using vbScript, JavaScript, Regex, MySQL, and Source Control.
- Volunteering to train new employees. Providing training and mentorship to 10+ consecutive new hires, enabling rapid growth of our team.
- Contributing to our "Escalated" task queue, which consists of high-difficulty issues normally reserved for the team lead.

Open Source Contributor

June 2022 - present

Various projects

Contributing code, fixing bugs, and making improvements to written content.

Major projects contributed to:

- freeCodeCamp
- Gatsby
- Full Stack Open

Projects

Bonsai Notes

TypeScript / React / Node.js / Tailwind

An intuitive and elegant note-taking app for the web. It lets the user categorize their notes using folders, which can be nested to any depth. Uses Object Oriented Programming patterns to keep track of the tree structure of the user's notes.

 [View Code](#)

Project Euler

JavaScript / Mathematics

A set of very difficult algorithm challenges. Solved the first 30 problems (and counting) using JavaScript.

 [View Solutions](#)

Budget Snapshot Tool

JavaScript / React / MaterialUI

An online utility that enables users to very easily mock up a monthly budget.
