TECHNOLOGIES

JavaScript

React

Node.js

Express.js

TypeScript

MongoDB

Gatsby

GraphQL

Git

HTML

CSS

Tailwind

MySQL

Software Engineer with a background in IT and software development. Looking to make an impact as part of a development team in a JavaScript-based technology stack.

EXPERIENCE

Rule Developer

(Apr 2019 - Present)

Transcepta LLC

- Teaching our system to intelligently recognize and extract data from varying file types.
- Performing programming tasks using vbScript, JavaScript, Regular Expressions, and MySQL.
- Volunteering to train new employees. Training and mentoring all our new hires, as our team grew in size from 4 to 12 employees.
- Creating new internal automation scripts to speed up shared workflows within the team.

Open Source Contributor

(Jun 2022 - Present)

Participating in Open Source projects. Contributing code, fixing bugs, and making improvements to written content.

Projects contributed to:

- Gatsby
- freeCodeCamp
- Full Stack Open

PROJECTS

Bonsai Notes

TypeScript / React / Node.js / Tailwind

A lightweight note-taking app for the web. It allows the user to categorize their notes using folders, which can be nested to any depth. Uses Object Oriented Programming patterns to keep track of the tree structure of the user's notes.

🔗 <https://bonsainotes.com/>

Project Euler

JavaScript / Mathematics

A set of very difficult algorithm challenges. Solved the first 30 problems and counting. [Progress and solutions can be viewed on Github.](#)

Budget Snapshot Tool

JavaScript / React / MaterialUI

An online utility that allows the user to easily mock up a monthly budget.
