TECHNOLOGIES

JavaScript	React
Node.js	TypeScript
Gatsby	Git
HTML	CSS
Tailwind	MongoDB
SQL	

Adaptable and experienced Software Engineer, looking to transition to a modern JavaScript development role. Proficient in React and Node, and skilled in both front-end and back-end development.

EXPERIENCE

Rule Developer   (Apr 2019 - Present)
Transcepta LLC

- Teaching our system to intelligently extract data from documents in varying formats.
- Performing programming tasks using vbScript, JavaScript, Regular Expressions, and MySQL.
- Volunteering to train new hires. Becoming the sole training coach, onboarding over 10 new team members in the span of two years.
- Producing internal learning resources, enabling more efficient ramping up of new hires and enhancing quality of work across the team.

Open Source Contributor   (Jun 2022 - Present)

Participating in various Open Source projects. Contributing code, fixing bugs, and making improvements to written content.
Major projects contributed to:
- Gatsby
- freeCodeCamp
- Full Stack Open

PROJECTS

Bonsai Notes
TypeScript / React / Node.js / Tailwind

A note-taking web application. It allows the user to categorize their notes using folders, which can be nested to any depth.
This project aims to provide a fully-featured and intuitive note-taking experience, without the steep learning curve found in other note-taking apps.
It's a work in progress, and current progress can be viewed on Github. It uses React for frontend logic, Tailwind for styling, and Object Oriented Programming principles to keep track of the user's notes.

Project Euler
JavaScript / Mathematics

A series of difficult algorithm challenges. Solved first 30 problems and counting. Progress tracked on Github.

Budget Snapshot Tool
JavaScript / React / MaterialUI

A web app that enables easy creation of a personal monthly budget. Allows the user to make changes and quickly visualize how their financial picture looks under different circumstances.
