TECHNOLOGIES

JavaScript	React
Node.js	Express.js
TypeScript	MongoDB
C#	Gatsby
GraphQL	Git
HTML	CSS
Tailwind	MySQL

Software Engineer with a background in IT and software development. Looking to join a development team in a JavaScript-based technology stack.

EXPERIENCE

Rule Developer   (Apr 2019 - Present)
Transcepta LLC

- Teaching our system to intelligently recognize and extract data from varying file types.
- Performing programming tasks using vbScript, JavaScript, Regular Expressions, and MySQL.
- Volunteering to train new hires. Providing training and mentorship to new hires as our team grew in size from 4 to 12 employees.
- Creating new internal automation scripts to speed up shared workflows within the team.

Open Source Contributor   (Jun 2022 - Present)

Participating in Open Source projects. Contributing code, fixing bugs, and making improvements to written content.
Projects contributed to:
- Gatsby
- freeCodeCamp
- Full Stack Open

PROJECTS

Bonsai Notes
TypeScript / React / Node.js / Tailwind

An intuitive and elegant note-taking app for the web. It allows the user to categorize their notes using folders, which can be nested to any depth. Uses Object Oriented Programming patterns to keep track of the tree structure of the user's notes.

🔗 https://bonsainotes.com/

Project Euler
JavaScript / Mathematics

A set of very difficult algorithm challenges. Solved the first 30 problems and counting. Progress and solutions can be viewed on Github.

Budget Snapshot Tool
JavaScript / React / MaterialUI

An online utility that allows the user to easily mock up a monthly budget.
